Detailed Action

This is the first Office Action corresponding to original filing. Claims 1-28 are active.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "ruler" (claim 14), the "light" (claim 15), the "clip" (claim 17), the "calculator" (claim 24), and the "cut-outs" (claim 26) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-28 are allowed over the art of record.

The following is a statement of reasons for the indication of allowable subject matter: none of the art of record discloses a document holder to be set on top of a laptop computer to hold at least one document above the screen of the computer, comprising a support member having a connection axis, and a shelf member pivotally attached at said connection axis, including top and bottom surfaces, a ledge attached to the top surface,

and a flange attached to the bottom surface, wherein the shelf member is movable between an open position where the shelf is substantially perpendicular to the support member, and a closed position where the shelf is substantially parallel to the support member.

This application is in condition for allowance except for the following formal matters: see objection to the drawings stated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Judd (4,902,078) shows a document holder having a clip (30), Gross et al. (5,122,941) shows a document holder having a light (128'), Marthaler (5,505,421) shows a document holder sitting on top of a computer, Chen (5,601,270) and Yun (5,826,840) show pivotally document holders.
